

6 JUL 1981

MEMORANDUM FOR: Chairman
DCI Security Committee

STAT FROM:
CIA Member

SUBJECT: DCID 1/14 Revision

REFERENCE: SECOM M-246, dated 22 June 1981, same Subject

1. Pursuant to Reference, the following suggestions are offered as modifications of the draft revision of DCID 1/14.

a. Delete the requirement that a Top Secret security clearance be a prerequisite for nominees for SCI access. In the context of compartmentation, this requirement is of questionable value and application. A Top Secret clearance does not guarantee access to SCI either in terms of adjudicative criteria or scope of investigative coverage.

b. Revise paragraph 5b(1) by deletion of the second sentence beginning with "For these purposes." Revise paragraph 5b(2) by addition of an asterisk. Finally, at the bottom of page 2, add a footnote to read:

"*Any references in this DCID to 'immediate family' shall be deemed to include the individual's spouse, parents, brothers, sisters and children. Any references to persons to 'whom the individual is bound by affection or obligation' shall be deemed to include any co-habitant."

These changes should avoid any indignation that could be occasioned by including a cohabitant as a member of the immediate family and, at the same time, provide for the listing of significant data.

c. Confine polygraph questions to counter-intelligence matters only. Eliminate any area that could be interpreted as involving lifestyle or suggests a catchall opening to lifestyle questions.

051 1389/A

d. Extend exemptions to the polygraph to include Cabinet and sub-Cabinet appointees.

2. I am prepared to appoint a representative to the group selected to prepare a paper for member consideration and approval.
